

- Very thin tail, usable for limited openings. Standard made of polyamide (PA) but optionally also available in PP for applications where less strength is required (e.g. emergency doors).
- Temperature resistant between -40°C and +80°C (PA) / -20°C and +80°C (PP)
- Designed for sealing utility meters but is also suitable for sealing grilles, hand tools, textiles, transport crates, fire extinguishers, various closures, control points, flanges, valves, bags...

KEY FEATURES

Available colours:        

Material	Polypropylene (standard) or polyamide (PA) with metal (stainless steel) closing mechanism	
Breaking strength	± 10 kg (PA) / 8 kg (PP)	
Dimensions	Total length	181mm without flag
	Usable length	149 mm
	Diameter tail	1.35 mm
	Print area flag	13 mm
Identification method	Laser	
Identification	Option	Logo of max 8 alphanumeric characters + 7-digit serial number
Order quantity	per 1000 (strips of 10 in numerical order)
