LOCKTAINER 2000SHC

- ISO 17712-2013: High Security Seals.
- Test certificate available upon request.
- Metal locking mechanism is encased in a steel ring and fully coated with ABS, a plastic that does not break easily but still makes any attempted tampering immediately visible.
- The data is burned onto a white label, protected by a transparent window making it impossible to manipulate or erase the data without damaging the seal housing.
